

LANA SHOTASHVILI

Frontend Developer | React • Next.js • TypeScript

 [Github](#)  [Linkedin](#)  shotashvililana@gmail.com  +995 579 25 52 69  Tbilisi, Georgia

SUMMARY

Frontend Developer with professional experience driving end-to-end web development using React, Next.js, JavaScript, TypeScript and Tailwind CSS. Currently building and shipping production-ready web applications at UniLab, translating Figma designs into scalable UI components, integrating REST APIs, and mentoring junior developers. Expanding backend capabilities with Node.js to build full-stack features

WORK EXPERIENCE

Frontend Developer

UniLab React Acceleration Program

04/2026 – Present | Tbilisi, Georgia

- Built and shipped 6 production-level web applications from scratch using React, Next.js, TypeScript, and Tailwind CSS.
- Translated Figma designs into pixel-perfect, mobile-first interfaces, building reusable UI components.
- Implemented server-state management and asynchronous data fetching using TanStack Query and RESTful APIs.
- Collaborated cross-functionally with backend developers and UI/UX designers to coordinate feature development, clarify requirements, and align technical implementation.
- Worked with Git and GitHub in a team development workflow, using Pull Requests, code reviews, and branch-based collaboration

Frontend Mentor

03/2026 – Present | Tbilisi, Georgia

- Mentored junior developers in building production-ready applications, fostering advanced problem-solving techniques and clean code architecture.
- Taught modern frontend fundamentals, delivering hands-on guidance across HTML, CSS, JavaScript, React, and Git/GitHub version control workflows.
- Conducted rigorous code reviews, delivering actionable feedback to enforce industry best practices, performance optimization, and modular design patterns.

Frontend Developer

Freelance Project

11/2025 – 03/2026 | Kyiv, Ukraine

- Engineered a responsive, 10+ page e-commerce application using HTML5, CSS3, and JavaScript, delivering a seamless experience across desktop, tablet, and mobile devices.
- Architected modular, reusable UI components, ensuring design consistency, clean layout structure, and cross-browser performance.
- Integrated RESTful APIs in coordination with backend developers, gaining practical exposure to application architecture, data flow, and backend integration workflows.
- Refactored navigation and visual layouts to elevate overall UX, leading to improved page load efficiency and mobile responsiveness.

Technical Support & System Administration Intern

Georgian Technical University

04/2025 – 08/2025 | Tbilisi, Georgia

- Maintained university live examination systems, conducting end-to-end quality assurance on test content, scoring logic, and platform stability.
- Audited large-scale digital exam datasets, tracking performance metrics and structuring accurate reports using advanced Excel workflows.
- Monitored system integrity and answer configurations, ensuring zero downtime and error-free evaluation during peak testing windows.

EDUCATION

Georgian Technical University

Informatics and Control Systems | GPA: 3.83 / 4.0
09/2023 – Present

Interbusiness Academy

Frontend Developer

11/2025 – 07/2026

SKILLS

Languages & Core Web — HTML5 | CSS3 |

JavaScript (ES6+) | TypeScript | SASS | RESTful APIs

Frameworks & Libraries — React | Next.js |

Tailwind CSS | GSAP | TanStack Query | Zustand

Tools — Git | GitHub | Bitbucket | npm | Vite |

Postman | VS Code | Figma

PERSONAL PROJECTS

Cocktail GSAP Website

React • GSAP • Tailwind CSS

Food website

HTML5 • CSS3 • JavaScript (ES6+) • REST APIs

Shop.co — E-Commerce Landing Page

HTML5 • CSS3 • JavaScript (ES6+) • Swiper.js

Photosnap

React • Tailwind CSS

LANGUAGES

CONFERENCES & ACADEMIC ACTIVITIES

Drone Swarm Choreography System

Engineered zero-collision 3D control pipeline for 200 simulated drones using Python, OpenCV, and NumPy. awarded Top-3 Honors.

V International Scientific and Practical Conference (London & Boston)

Published research on 3D volumetric geometric modeling using AutoCAD.

AI Camp & Public Speaking Camp (Re:educate)

Built practical AI solutions in agile teams, sharpening collaborative software development skills
